

*We Mercies*

## *Care for Creation*

*As we take the first step, let us remember the traditional custodians of the land*

*“‘Call of the Reed Warbler’ will change the way we farm, eat and think about food. In this ground-breaking book Charles Massy explores the regenerative agriculture and the vital connection between our soil and our health.*

*Using his personal farming experiences as a touchstone, he tells the real story behind industrial agriculture and the global profit-obsessed corporations driving it. He shows how innovative farmers are finding a new way, regenerating their land and witnessing astounding transformations.*

*Evocatively, he captures what it truly means to live in connection with the land.*

*For farmer, backyard gardener, food buyer, health worker, policy maker and public leader alike ‘Call of the Reed Warbler’ offers a clear vision of a sustainable future for our food supply, our landscape, our health, our Earth.*

*It offers hope and powerful affirmation of our potential for change.*

*Now is the time for a grassroots revolution.”*

This piece is taken from the back cover of the book.

It is a big book, 500 pages, but well worth the reading.

I do commend it to those of you who have the energy and time for such reading.
